

Incident RSK-2026-081 (brute_force, high, status contained) | generated 2026-09-29T14:05:00+08:00

[illegible]

40 failed logins for 'admin' from 203.0.113.45 in 3 minutes, then an SQL injection attempt on /search.

- Host: portal (web), source IP: 203.0.113.45, user: admin
- Classified by: rules, AI confidence 0.94, points 23.5 (base 25), inaction penalty +30
- Recommended action: Block 203.0.113.45 for 2 h and rate-limit /login

Time	Demo time	Event	Points
2026-09-29 13:54:04	+0:00	Brute force detected on /login (+25)	+25
2026-09-29 13:55:04	+1:00	1 h unacknowledged: inaction penalty +5 (total +5)	+5
2026-09-29 13:56:04	+2:00	SLA breached, team lead copied	
2026-09-29 14:00:34	+6:30	SQL injection on /search (+54)	+54
2026-09-29 14:00:40	+6:36	Autonomous containment: block_ip 203.0.113.45 (TTL 2 h)	

- ntf-0001 (incident_opened): Delivered 2026-09-29T13:54:06+08:00 via telegram (message_id 4242) to operator, Ack: none
- ntf-0002 (sla_breach): Delivered 2026-09-29T13:56:05+08:00 via telegram+email (message_id 4250) to operator, lead, Ack: none

Delivery receipts prove an alert reached the channel (message id + timestamp) and an acknowledgement proves the operator responded. Without an acknowledgement SentrAI cannot prove the alert was read, so it reports 'Delivered <ts>, Ack: none'.

Time	By	Decision	Note
2026-09-29 14:00:39	Countersign	approved	Risk 88 is over the tolerance of 80; block is temporary and reversible.

Containment actions

Action	Type	Target	Mode	Approved by	Status	Expires	Snapshot
ACT-0007	block_ip	203.0.113.45	autonomous	Countersign	active	2026-09-29 14:02:40	0707070707

Hash-chain proof

Each audit record stores the hash of the one before it, so changing or deleting any record breaks every hash after it. Re-check at any time with `GET /audit`.
